Suggestions to Customers in ordering from this Catalogue which, if followed, will be of mutual aid.

How to Order.—Please write your name, Post-Office and State plainly; if your express or freight office is different from your Post-Office don’t fail to mention it.

We Mail Seed Postage Paid (except as noted). We deliver Free to any Express- or Post-Office in the United States all Flower and Vegetable Seeds quoted in this catalogue by the Packet, Ounce, Quarter-pound or Pound. If Peas, Beans, Corn, Onion Sets, Grass and Field Seeds, Fertilizers or Insecticides are wanted by Mail please add postage to cover cost of Parcel Post. The average weight of 1 qt. of Peas or Beans is 2 lbs.; Corn, 1½ lbs.; Onion Sets and Lawn Grass Seed, 1 lb. Express charges are as a rule cheaper than Parcel Post on large packages.

By Express.—Express rates are now very moderate and we recommend this service where quick delivery is wanted. Seeds and Bulbs are carried at a special rate of 25 per cent. less than general merchandise and by experience we have found this service not only quicker and safer but very much cheaper than Parcel Post except on small Packages.

Our Service Department will take pleasure in advising any of our customers desiring assistance or advice in connection with the Garden or Farm.

How to Send Money.—Send cash with order by express or registered mail, by draft on Philadelphia or New York, or by Postal Money-order. Postage stamps will be found a convenient method of remitting for small amounts.

No Charge is made for boxes, packing or bags except for 2-bushel seamless sacks at 50c each, which are returnable for credit at price charged.

Wholesale Prices to Market Gardeners and all other Large Purchasers of Seeds —If you purchase Seeds largely or grow Vegetables for market, send for our Market Gardeners’ Quarterly, which gives our wholesale prices to which you are entitled.

Warranties.—Seeds of best quality will often fail through improper treatment. Thus, a small seed may be sown so deeply that the young plant cannot reach the surface. More failures result from disregard of the conditions necessary to germination than from inferiority of seeds used.

Buist's Mammoth Red Globe Turnip. (The most popular variety)

**Buist's Prize Stock Turnip Seeds**

Prices Include Postage.

For a general Fall crop, sow late in Summer or early Autumn the flat strap-leaved varieties broadcast, and the large, round varieties in drills. If you have never grown Buist's Mammoth Red or Purple Top Globe, try it; it can be sown either broadcast or in drills. Ruta Baga, or Swede, should be sown in July or early in August, and always in drills 20 inches apart, and then the plants thinned out to stand 6 inches, as the plants grow ridge up to them, otherwise they will form no bulbs.

Sow 1 ounce to 100 feet of drill; 1 1/2 lbs. to acre in drills, or 2 1/2 lbs. broadcast; salad varieties, 3 lbs. to acre.

LETTUCE

Lettuce can be successfully raised during the Summer months in the South with a little extra work if the following plan is followed: Before sowing, soak the seed for an hour in water, then place in a piece of cloth and put in a cold place. Keep the cloth moist and when the seed is well germinated, sow broadcast, and transplant when the proper size. It is best to transplant in the evening and water well. Lettuce seldom, if ever, heads well in hot weather, and should be used when young.

Buist’s Selected Big Boston Lettuce

BUIST’S SELECTED BIG BOSTON.—Our strain of this very popular variety is unsurpassed. Thousands of acres of Big Boston Lettuce are grown annually in the South; the Market Gardeners of that section pronounce Buist’s stock The Best on the market. Plants are large and vigorous, leaves light green, slightly tinged with reddish brown; stands very long before shooting to seed. Can be grown in the open ground, in the Spring or Fall, or in frames for early Spring planting; does particularly well in cold weather. Oz., 20c.; ¼ lb., 60c.; lb., $2.00.

BUIST’S UNRIVALLED.—Heads are very large and solid; the general character is very similar to Big Boston, except that color is light green and not tinged with brown.

BUIST’S “VERIBEST” CABBAGE HEAD.—Heads are solid, crisp and tender, absolutely free from any bitterness. It can be sown broadcast in September and transplanted in cold frames for heading during winter. Per Oz. Per ½ lb. Per lb.: $0.20 $0.60 $2.00

**DWARF ESSEX RAPE**

The True English Essex

A forage plant of the greatest value, of rapid growth, yielding from twenty to twenty-five tons of green forage to the acre, which affords the finest pasture for sheep, hogs and cattle. It is perfectly hardy and withstands drought, and becomes established in from five to six weeks after sowing. For Fall pasture in the Northern States, sow broadcast from May to October, and in the South during September and October for Fall, Winter and Spring pastures; it requires six to eight pounds to sow an acre of pasture, and from three to four pounds in drills. Lb., 20c.; 10 lbs., $1.60; 50 lbs., $7.50. If wanted by mail, add postage.

**BUIST’S LAWN GRASS SEEDS**

Buist’s Lawn Grass Mixtures are composed of the finest varieties of grasses (absolutely free from weeds and trash) each of which has its season of beauty, and the result of this blending is the production of a sod that is not only always evergreen and velvety in appearance, but of the color and beauty of an emerald.

Lawn Grass Seed can be sown either in Spring or Fall. September and October are the best months to sow in the South, as it will give a nice green lawn during the Winter and become well established before hot weather comes on.

It requires four bushels to sow an acre, or for renovating old lawns, about half that quantity.
